

# The Perfect Birthing Ball!

Baby Bouncy provides multiple benefits to expectant and new mothers.

**In Birthing Classes:** Women put their trust in you, and that is why you offer the safest and most stable birthing ball around. We provide you with birthing balls for your entire class so *each* student gets the education and hands-on training they need to properly and effectively use a birthing ball before and during labor.

**At the Hospital:** It's convenient! Expectant mothers can take their Baby Bouncy with them to the hospital and use *bedside* with the stability stand provided for extra support and safety. Baby Bouncy can help ease back labor and correctly position the baby for childbirth.

**Or at Home:** Moms can use Baby Bouncy while laboring at home and help relieve some discomfort and pain associated with contractions while providing focus for the mother. After baby is born, it is an essential tool for use in regaining pre-pregnancy shape, and it **NEVER** fails to calm a fussy baby!

# Recommend Baby Bouncy to your patients so they can reap the benefits of a birthing ball system — before, during, and after childbirth!

## Who Baby Bouncy is:

Baby Bouncy, Inc. is a national leader in providing birthing ball equipment and accessories worldwide. We work with numerous hospitals, birthing classes, and nurse-midwives across the United States.

The Baby Bouncy™ Kit includes a high-quality 65 cm inflatable Anti-Burst Ball, Air Pump, and Stability Stand. The Ball and Stability Stand are specifically designed with safety in mind. The Anti-Burst Ball can support up to 1,000 lbs. and the stability stand aids the user by keeping the ball in place.

## The Baby Bouncy Advantage!

### Anti-Burst Quality Ball

Our product is made of anti-burst material, different from most exercise balls. If our Ball is punctured for any reason it will never explode, but will only slowly deflate, offering your clients peace of mind.

### The Support Stability Stand

The Baby Bouncy™ Kit includes a Stability Stand to provide extra stability and safety for the mother when they need it most. The birthing ball rests safely inside the Stability Stand, allowing the mother

to sit and continue her exercises without the risk of losing her balance or the ball rolling away.

The Stability Stand easily assembles making set up simple, and it disassembles for easy travel.

## Enhance Your Birthing Program!

Our Baby Bouncy™ Kit can be added to your existing program in two ways.

1. By purchasing the Baby Bouncy™ Kit at wholesale and reselling to your clients at the suggested retail price.
2. By purchasing the Baby Bouncy™ Kit at wholesale and including the Kit as part of a "Welcome Package" for expectant moms – making your practice stand out from the competition.
