

*Bounce your way to a happy baby!*

## What is Baby Bouncy™?

Baby Bouncy™ is the newest “must have” product for new parents!

Baby Bouncy™ provides new parents the ability to quickly quiet a fussy baby and relax their baby to sleep.

Baby Bouncy works the core muscles and strengthens leg muscles while using it with or without baby!

How many products offer a way to calm and relax your baby while you get a workout?

The Baby Bouncy™ kit for new parents includes the following:

**Anti-burst Ball (65cm)**  
**Stability Stand**  
**Hand Pump**

### The Anti-burst Ball:

The Anti-burst ball is specifically made with safety in mind. This ball can hold up to 1000 lbs. of weight and will not burst if accidentally punctured (ball will slowly deflate). Once the ball is inflated (using the hand pump provided) parents are to sit on the ball and gently bounce while cradling their baby. The bouncing motion quickly quiets and relaxes a fussy baby. It even soothes them to sleep! This motion is a great way to comfort a crying baby during those peak inconsolable times.

### Stability Stand:

The stability stand is provided for added safety to keep the ball still while parents are sitting on the ball and while bouncing their baby. The stand comes in 4 pieces that easily snap together to create a circle to prevent the ball from rolling. These pieces can be taken apart quickly and easily which makes them great for those who would like to travel with their Baby Bouncy™.

### Hand Pump:

The hand pump provided with the Baby Bouncy™ kit is just the perfect size. It will quickly inflate the Anti-burst ball and is so small that it can easily fit in your travel bag—once again making it so easy to take the Baby Bouncy™ with you wherever you go!

*As if calming your fussy or colicky baby wasn't enough...there's more!!*

## ADDITIONAL BENEFITS:

### *Birth Ball\* (during pregnancy):*

Use your Baby Bouncy™ as a birthing ball during your pregnancy to condition and strengthen your abdominal muscles, as well as your lower back muscles to help prepare your body for delivery!

### *Birth Ball\* (during delivery):*

Sitting on the ball will help keep the baby properly aligned in the pelvis. Use the stand provided for additional safety as pregnancy can “shift” your center of gravity. Using the Baby Bouncy™ ball during labor may speed up dilation and improve progress during labor.

### *Exercise Ball\*:*

Baby Bouncy™ is perfect for all sorts of exercises and a great way to get back into shape post-pregnancy! Just pop in your favorite “exercise ball” workout DVD or VCR tape and use your Baby Bouncy™ ball to:

- Improve your balance
- Increase flexibility
- Build strength
- Tone core muscles
- Strengthen leg muscles

\*Before you begin use consult your physician for permission.

### *Traveling:*

Traveling with Baby Bouncy™ is so easy. The anti-burst ball can be easily deflated and packed in a bag or suitcase along with the stand and hand pump for a surefire way to calm a fussy baby and bounce them to sleep wherever you are!

### *Gift Idea:*

For those who are struggling to find the perfect new and unique gift for their loved one...this is it! Baby Bouncy™ is a unique gift and will be a favorite with any new mom!

### *Price:*

Retail price for Baby Bouncy™ Kit is only \$39.99.

Here's what people are saying about Baby Bouncy:

*"Gently bouncing on Baby Bouncy allowed me to hold my baby and give her the bouncing motion she desired during those inconsolable times."*

*"The only way to get my crying and colicky baby to calm down was while bouncing on Baby Bouncy."*

*"I found my baby liked to be gently bounced while being held to get her to sleep. Baby Bouncy allows me to do just that as well as tone my body after pregnancy."*

*"We used Baby Bouncy to calm our baby when all else failed."*

*"My baby likes being held close to me, she also likes it when I bounce her to sleep. Baby Bouncy allowed me to sit while doing both!"*
